****Note:** Tap on the game window in the middle of the screen to see the same picture as in the pictures provided above. This happens pretty often. If you use the sdcard before the download finishes, then the phone will tell you that the sdcard is full and the download has to start again. You will usually have a message like "sdcard full", even if the sdcard is not full. If you have already used the sdcard once, then the phone will try to download again and will check the db for this process. On my phone, the phone is now in download mode for a long time. If you have used the sdcard at least 5 times, just wait until you receive an msg from the phone like "sdcard full". My suggestion is: Try to clean the data directory once, and delete some photos

first. If the problem still happens, then it's ok, try to wait. Sometimes this is ok. If the problem still exists, then you have to try to remove the sdcard from the phone and try again. If you have a future problem, then this procedure may be useful: The problem: I have recently bought a new phone and I have noticed that I have about 200 emails and 160 photos in my "Droid."
