The effect of the atypical neuroleptic ziprasidone on intraocular pressure was studied in conscious rabbits treated twice daily for 14 days with one of three doses of this drug (1.0, 2.0 or 4.0 mg/kg) by oral administration. In each rabbit, i.e. at baseline, after 7 and 14 days of treatment, the IOP was measured after 10 min of supramaximal current stimulation applied through an external ear-clip by a silver-wire needle placed through the eyelids. With the two higher doses of the drug the mean IOP was consistently reduced by 9.8% (p less than 0.001) and 14.9% (p less than 0.05) after 14 days. After 14 days of treatment with the two higher doses the IOP was significantly decreased compared with baseline after the third dose of drug. MR NRG2ISO is a lightweight and simple-to-use program with a name that perfectly describes its functionality - it allows you to turn NRG files (used by Nero Burning ROM) into ISO disc images. It can be easily handled, even by less experienced individuals. This tool can be of assistance when your optical disc authoring program supports ISO items but not NRGs, for example. This is a portable app, so installing MR NRG2ISO is not necessary. It means that you can save the tool to a removable device (such as a USB flash drive), store it on any computer and directly run its executable file. What's more important is the fact that no new entries are added to the Windows registry and no leftover items can be found after program removal. The interface of MR NRG2ISO is based on a small window with a standard layout. Importing NRG items can be done with the help of the file browser ('drag and drop' is not supported). Unfortunately, you cannot process multiple entries at the same time. So, you can check out the source path of the item. Since MR NRG2ISO has limited features, all you can do is specify the output directory and filename, in order to proceed with the conversion procedure. Additionally, you can specify the transfer block size. The straightforward piece of software requires a low-to-moderate amount of CPU and system memory, in order to finish a task in reasonable time. We have not come across any issues throughout our tests; MR NRG2ISO did not freeze, crash or pop up errors. No recent updates have been made. What is new in this release: v.2.0: - ISO option has been added. This option is located on the "Settings" tab To use the ISO option you need to select "Choose from disk". If you press the button "Choose from CD-R/RW", the program will search for your disc, so it is strongly recommended to select the source disc in advance. If you select "Choose from CD-RW" or "Choose from CD-R", you will see an option where you can specify the destination folder. If you don't select a destination folder the program will create a new one in the same directory
