Galactic Mining Corp (GMC) is a blockchain based platform that aims to provide a simple and convenient way to mine and trade cryptocurrencies through a Decentralized Autonomous Network. GMC lays out a pathway to a fair and well-managed network. Those involved can earn income by providing data or by providing a computer to the network. However, there are many other ways to earn coins. Many miners who have no knowledge of the network or its functions will simply join to minimise the risk of being punished. So, why is GMC different to other DEX? GMC employs a few unique features. It is the first DEX to offer the ability to mine directly from the Ethereum blockchain. All mining is done by the user, and has no impact on the network or interference with any other machines that are running. The data is then stored in Ethereum, and eventually relayed to the Decentralised Autonomous Network (DAO). This means that it can be more accurately controlled, and may be developed in parallel with other DEXes. At GMC mining is open to all, meaning that no one is excluded. 28 THE PREMIUM FUNCTIONALITY GMC is a platform that allows individuals to generate income from mining and trading on the Decentralised Autonomous Network (DAO). As a poor miner in the icy UnderMine of Delvemore, you are expected to brave dangerous subterranean nasties to find valuable treasures and a way out of the cruel reality of your existence. Your food and necessities are provided by the town guard, but your pay is humble (if you're lucky) and your working conditions are often grueling. The UnderMine is full of secrets to find, both natural and artificial, and you will find that your incredible powers of perception and deduction are not the only tools you'll need to uncover them. As a persistent experiment by Delvemore's mayor, enemies have been placed in the UnderMine to test your subterranean survival skills, including a series of savage biomechanical assassins, lurking parasites, and what appears to be a hungry ghost. You must work your way out, one Delvemore peasant at a time!Take on the role of a Delvemore Miner. Fight, claim, recover, resist, and maintain. UnderMine is a turn-based Action Adventure game with a heavy focus on RPG elements. The game has a survival-based perma-death mechanic as well as a new/old save system. Gameplay is point and click with time of day changes, which allows for a variety of escape windows. UnderMine is a completely procedural design. We use procedural design to keep the game fresh and interesting. The terrain in the game is entirely dynamic, and new areas will be uncovered as you level up. We're not using a grid for movement, but rather a local occupancy system. When moving or picking up an item, we determine the closest neighboring tile that is not blocked by an obstacle. This allows for movement that feels fluid and dynamic. UnderMine is a Mac and Windows game. It's currently in Early Access, and we're actively working to build out the content we have. Right now the game is only partially playable; but the plans and the goals for the game remain unchanged. UnderMine: A Miner's Tale v0.1.1 A desperate attempt to escape the UnderMine Wickedly Lighthearted This First Release is a mere peek into the world that UnderMine provides. Explore the game, fight off enemies, and recover items to maximize your ability to survive. Some items are optional and can only be obtained by certain end-game bosses. The end-game bosses are optional too, but it is recommended to use the items they drop to prepare for the fight. The items are discussed in

What's new:

New record in the United States, can be considered an absolute milestone in the history of motorsport around the world. After 10 years of racing, Vettel became the first driver to score an historic triple, with victory in all three major categories: GP2, 24 Hours Nürburgring, FIA World Endurance Championship. It is a triumph that brings him back to the title.The race in Austin is the last race to count the points which was obtained by Vettel in the GP2, a period of one year dominated by the two times dominant Marussia. He knows what to expect and how to prepare his spare cars. While Vettel is already preparing for the USA race, his team mate Grosjean is in his first race in Formula 1. The Frenchman returns from a back injury that forced him to an early end to 2012. Grosjean wins the record of nine penalty points.The Mexican track is ideal for Dallara: his advantage is theoretical, but this week is the beginning of winter and the track condition is marginal. Vettel won the pole, but a lack of grip at the end of the race, which has an exceptional bump, means he crosses the line to second place. The victory goes to

Grosjean by 56 thousandths of a second. Vettel is third, with the pacesetter of the race Marussia M-Class, and two almost identical cars are fifth and seventh, Williams of Nico Hülkenberg and Carlos Sainz. GP2 - Vettel wins the United States the second time It was the first season when Vettel crowned champion, becoming the first to do so after only two years. It was a season where he got to know the raw Berocca 75 in New York, 2010 Victory Bridge, 2012 Nardo where he took his only pole of the season and Lucas Pérez. Vettel has 14 poles, 12 wins, 11 fastest laps, 17 podiums in the category. The German also has 22 wins in GP2 with three of them in which he has won using a car he campaigned as Marussia. 2011 was undoubtedly the best season Vettel. His final years at Red Bull he was not even racing in the top European drivers. The happy end came as a result of the unanimous decision of the drivers Carlos Sainz and Nico Hülkenberg, who believed that the potential of the team MARUSSIA (ex-Caterham) would be to be the championship title holder

DCS World DCS: MiG-19P Farmer is a highly detailed recreation of the MiG-19P interceptor that was developed by the legendary MiG-19P developer RAZBAM. More information about the MiG-19P Farmer can be found at DCS World DCS: MiG-19P Farmer brings the world of the MiG-19 interceptor into the next generation of simulations. The high-fidelity aircraft model is based on the actual radar from a MiG-19P that was shot down by the US Air Force in May of 1969. The incredible level of detail made it possible to recreate the images produced by the radar system including the map feature and target data. The terrain used for the DCS: MiG-19P Farmer is based on the US soil. The terrain is realistic in all aspects, including details like radio tower positions, road patterns and also trees and vegetation. The visual elements of the terrain come fully pre-rendered in the shader technology to give a totally seamless integration with the rest of the terrain. The original fan-friendly documentation is reproduced faithfully with the included DCS:

MiG-19P Farmer Manual and the developers still release new expansions with new features, new weapons and additional documentation. DCS: MiG-19P Farmer is an exceptional combat experience with years of intensive development, a vast amount of features and a realistic combat experience that makes the DCS World series stand apart from the other flight simulations. DCS World DCS: MiG-19P Farmer is the perfect match for X-Plane users and gamers that want to get into the world of the MiG-19P interceptor and fight with the US Navy Pilots in the Korean War. For more information, visit Includes high-resolution textures, including specular and bump mapping as well as the ability for a physically-based rendering (PBR) pipeline. This means that high-resolution sub-surface scattering is calculated and used in real-time. High-fidelity model based on a MiG-19P that was shot down by the US Air Force in May of 1969.
