media elites love pointing to the record
number of women running for office as proof
of the era of “female empowerment.” And for
all the good those women are doing, a nation
of women isn’t the reason why “you can’t be
racist anymore.” Anyone who visits the
college campuses these days knows how far
left the culture has gone. The campus leftists
push for sexual and gender identity, and they
have a right to do so. But it is the victories on
the left that are the most troubling. The way
the left manufactures consent for abortion,
the way it creates the “climate of anti-
fascism,” the way it takes speech codes that
once applied to fraternities and sororities and
the military and now applies to the whole
culture, all those are troubling. What is
equally troubling is the descent into the

lowest kind of behavior. The group of college students who are more concerned about “offending other people” than they are about “making progress” are a group that is taking its cues from a single man. President Trump has been unapologetic about the sexual harassment that he claims to have suffered and the locker-room talk that led to his infamous “Access Hollywood” remarks. But today’s college student is less concerned about those things. He is a man who makes a habit of brutal violence on the right as a means of expressing himself. He is a man who has refused to condemn Islamic terrorism, and as for other terrorists, he only points to the evil he claims they did. And to celebrate the men who are now running the culture in college, the college students are showing the approval of a man that reflects his own sick and twisted desire. They were with the man who has most publicly embraced the sexual abuse of women. The whole movement is about a strong man who

intimidates the competition and then reveals

Call of Duty: Modern Warfare () is a first-person shooter developed by Infinity Ward and published by Activision Publishing, Inc., who also published the Call of Duty series. It was the 4th game in the Call of Duty series, and the first to be released in the first-person view (FPS) as a "more immersive" version of the previous Call of Duty games. It was also the first game in the Call of Duty series to be released on the Xbox 360 and PlayStation 3. It was released in October 2007 in North

America and November 2007 in Europe. The game's plot is set in the fictional modern day, the year 2018, and follows US forces consisting of the Army's 12th Combat Aviation Brigade, 2nd Air Cavalry Regiment, 3rd Armored Cavalry Regiment, 1st Special Forces Group, and Marine Aerial Refueler Squadron 304, who are locked in a war against Russian forces consisting of the 1st and 4th Special Forces Brigades, and the Russian Airborne Troops. The battle is influenced by Russian and United States forces' operations during the War in Afghanistan. The game features a plot-less single-player campaign, a new multiplayer component based on the Urban Warfare map Call of Duty: Modern Warfare 2, a new Zombies mode called Undead Nightmare, and a series of mini-games called Extinction Mode, including Rush. The game features online multiplayer, a more FPS style of gameplay, includes several new weapons, including the AK-74M, the PKM, the HK M40,

the M4A1, the SCAR-L, and the G36C.

Â Players can use any of these weapons (as well as the previous weapons in the previous games). They can also use a new helmet, the

Mark IV Combat Helmet (MCV). The game also has a new set of multiplayer maps called "Relic". A previous Call of Duty title, Black Ops was developed by Treyarch and released in November 2007. It was titled Call of Duty: World at War until the release of Black Ops.
