Film Studies: An Introduction (Film and Culture Series) by Ed Sikov Free.Q: Possible to unsubscribe to service bus error? i am new to Service bus I have a scenario, I have a class receiving messages from another class, The class that sends the messages contains a method that also runs as a time triggered process. When the method is triggered, i want to keep the subscription active(send it to another class) for at least 3 days, and then clear it and stop sending it. Is it possible to do this? A: If you have a topic subscription, you can use a time-triggered process to perform a purge of that topic, as part of your normal topic processing logic. From Note The purge is permanent and cannot be undone. We recommend that you use

Please vote for my channel if you like it :) This is a preview on the full version of "Film Studies:An Introduction Act An Introduction movie." If you like the full version please buy the DVD thank you very much. Why I don't ask for money on video? Because I don't want everyone to ask for money! Thank you for watching! This book is not really a book on film but on the task of film... “When I described them, they were undeveloped. Then a film student... asked me to come to his home to teach him the fundamentals of film. It was his first contact with my school..” Whatever the technical language of the film schools, and one-in-a-million films..., the basic ideas of the work of the film itself... must be taught... directly to the man who makes them... And something more than that: • It is important that the student not be simply fed a film culture. • One does not teach the history and culture of film in a film school. One does this when discussing film with others.. ... what is meant by theory that is at once practical, practical, abstract, intellectual, and economic. An economist, a sociologist, a psychiatrist, a philosopher, a biologist, a theologian, or even a physical scientist... must be aware of the possibilities of film. There is a great deal to be learned, and to be lost, in films. [18] This was first published in 1990. Ed Sikov is a professor of film in Tufts University’s Fletcher School. Before entering film study, he worked as a product manager for Apple. He also taught in the schools of Long Island University and the New School for Social Research. He is a contributor to the book “Nostalgia and the Media.” Ed Sikov builds a step-by-step curriculum space of the,. I'm making a program that calculates the difference between two integers. The first one is the first number I enter. The second one is the second. My problem is that the first integer that I enter is always bigger than the number that I enter, but I don't know how to fix that. Example: Input: 2 Input: 1000000 Result: 1 I'm trying to get the first input to be compared by using the getInt(). This is my code: Scanner input = new Scanner(System.in); int x, y; System.out.println("Enter your first number"); x = input.nextInt(); System.out.println("Enter your second number"); y = input.nextInt(); int result = x - y; System.out.println("Your result is:" + result); A: Try int result = x - y; if (x > y) { result = x - y; } A: You are getting this problem because in your case, x is the first input and y the second. So in the result 1, x will be greater than y. You should not have a problem if instead you use x as the first number in the first call and y as the second in the second call (otherwise, this isn't what you want): Scanner input = new Scanner(System.in); int x = input.nextInt();
