Adobe Photoshop 2021 (Version 22.2)

One of the most popular packages, Photoshop Elements, is really more like an advance version of Photoshop CS. It has been the market leader and a go-to tool for beginners for several years. People often use Photoshop Elements because they need fewer features or can get by with simpler tools. Adobe also offers several other image editing tools that cost less, but they offer fewer options. The best place to start if you have little or no experience with image editing is with the online galleries of your local library, which usually have a free and fairly comprehensive selection of image files. Basic anatomy of a Photoshop file When you save your file, it is called a "psd" file or PSD. A Photoshop file has layers, which you can use to subdivide your image into separate areas for different parts or tasks. The layers can have their own opacity setting, so you can see what's below what by reducing the opacity of the image area you want to see. Each layer has its own fill color. And each layer can be easily moved and resized. You can save the file as a JPEG or Adobe's newer TIFF format, which is a bit harder to edit. Typically, if you need to manipulate an image with some of the more esoteric editing tools, you'll save it as a PSD. Layers If you're a Photoshop beginner, you'll probably wonder where the layers come into play. Photoediting involves manipulating pixel data in an image. The way you do that is to add new layer data to your image. When you've done that, you can change the color or opacity of the layer. In other programs, such as Elements, you'd do this by using a layer style. In Photoshop, you make a layer with the new image data on it, adjust the color or opacity, and save it. The next time you edit the image, you go to that layer and change the settings. Each time you add a layer, you have to start from scratch, so it's easier to start with a blank layer and avoid creating a bunch of layers with blobby or out-of-place images. In Photoshop, you have access to 16 layers, but you can apply the same settings to each one. If you want different settings on different parts of your image, it's a good idea to create a new layer for each area. Most (if not all) tutorials for the most recent versions of Photoshop place

Image caption Lord Heseltine advises on construction and regeneration projects for the UK's Department for Transport Three out of four of Britain's largest infrastructure projects have been delayed, the work chair of the civil service reform programme has admitted. Ministers are scrapping the Post Office's monopoly on local delivery and improving the levels of government funding for transport projects. Lord Heseltine said the change in attitude since he reviewed government performance in 2010 had been "imperceptible". But he argued that if things continued in the same way, it would be "game over for the future of infrastructure". Lord Heseltine, who is chairman of the Civil Service Reform Group, outlined his latest annual report on the government's performance in infrastructure projects at a Westminster media briefing. He also had some advice for the chancellor, George Osborne, over the impact of cuts in public spending on infrastructure projects. "I would say that many of these projects are on a reasonable track and we should finish them, and as long as your fiscal head is reasonably clear there should be no problem with continuing the funding," he told BBC News. "Of course, there will be moments in the year when you find yourself sitting on a pile of rubble in the construction industry. That will never come to an end." He also highlighted the closure of the government's flagship project, the Green Street development in Bristol, which had lost £10.5bn when money was tied up in the construction of an office block in the centre of the city. 'Game over' Lord Heseltine, who spoke to the BBC News on the sidelines of the Infrastructure Week conference in London, said the government should have taken on the role of financing infrastructure projects, rather than relying on private investors to fund them. When they were collecting taxes from companies and individuals they didn't have to think about how they would be spent Lord Heseltine, Chairman of Civil Service Reform Group "It's about time that we decided to get our act together and to take responsibility," he said. "In the 2000s many of these projects never had much chance of success because of the way we had been behaving. "We are now in a much better position and that is why we should make it clear that we shouldn't repeat the errors of the past. "We are seeing a new willingness to take on a more active role, not just a market role, in these
