I was wondering if there's a way to quickly (or ideally, on the command line) replace every instance of a number with a literal '0'? I'd like to convert every instance of, for example, 595 with 0595 (and the same for other numbers), but I have no idea how to do that. Thanks in advance! A: Are you sure you want to do that? Have you checked the output of the file? Try find. -type f -exec sed -i "s/[0-9]*(595)/0(595)/" {} \; Q: Use EnumMemberAttribute on Enum Properties I'm trying to use custom attributes to mark enum properties as constant, but I'm struggling to create the right one. I'm trying to follow this guide (Constant properties of enum types) and this should be enough. It compiles fine, but for some reason I still can't access the property. Here's the code: [AttributeUsage(AttributeTargets.Field | AttributeTargets.Property | AttributeTargets.Parameter)] public class EnumMemberAttribute : Attribute { } public class MyClass { public enum Foo { [EnumMember(Value = "a")] A = 1, [EnumMember(Value = "b")] B = 2 } } var c = new MyClass(); var a = c.Foo; var b = c.Foo.A; var v = c.Foo.B; Here, a.ToString() and b.ToString() both return "System.Private.CoreLib.Enum.EnumMemberAttribute+ValueB". Is there anything I'm doing wrong? A: The reason it doesn't work is that the constant value you're passing is being combined with Enum.ToString. I'm not sure how you expect it to work in the code you've posted (I don't think there should be any code in the ToString() method at runtime), but with your code, a ToString() call on enum member values will return a string containing
