## Lonely Planet Mexico (Travel Guide).epub 2021

[Download](#)

you see, lonely planet is more than a guidebook company, its a brand that supports a portfolio of brands (lp, peru, new zealand, japan, china, france, and the india). and its not just a brand, it is a collection of brands with their own identity, their own history, and their own audience. you can see the difference between the physical lp guidebooks and the digital version of the guides in the marketing. to advertise the digital travel guide, lonely planet has started calling the guides #digitalguides and using both images and videos on its digital site instead of the old-fashioned photos. even the website for the mexico guide includes a video of a woman making a butter sculpture that was made to promote the guide. its all about movement, not stillness. i realized this after i read the first of the four travel guides on my kindle, venturing mexico. the first sentence in the book begins with, mexico is a connected and inherently social culture. in other words, are you

---

moving, not still. actually, the first few pages of the book are really just a marketing pitch. they go on and on about how lazy americans are because they dont know the difference between a mambo and a mambo (so, he says, if you dont know the difference, you arent any different than the lazy americans that dont know this distinction). but we are not lazy, are we? if you want an Ip e-book reader feel free to go to amazon where you will find many, many places to buy it. most of them work great but i picked this one because i thought it looked the most state-of-the art, the one they looked like they would want, so that made me think it would be the best option. if you want the manual, they also have a travel+manual thats \$26.95, the travel guide is free.

**Lonely Planet Mexico (Travel Guide).epub**

our reporting and photography are guided by a deep belief that storytelling is a cornerstone of travel. and one of the most effective ways to enrich our travel stories is by weaving the stories of the locals. our guides are experienced at spotting the best stories and their writers are experienced at uncovering these stories. the point was not to impose on our friends, but to ask them to go on the journey with us and share their experiences. we do not pester or patronize our interviewees - quite the contrary, we make an effort to set up an interview in a context that is both conducive

---

and relaxed. it is not about the business of getting to know our friends, but about offering them a compelling glimpse of their own lives and their own reality - even if their reality is not our own. i hope we have succeeded in that endeavor. immersing yourself in a place is not a substitute for experiencing it for yourself. all the walking, climbing, swimming, cycling, wandering will not substitute for sitting and absorbing that place - and the stories it tells. i am sorry, but i am not sorry to say that i do not love lonely planet. after over 25 years of writing and editing, ive lost my passion for lonely planet. its much more about stats, numbers, and reviews. its not about telling the kind of stories i want to tell. what i would like to see is the thing that changes the way people travel, that people recognize as a world class travel guide - which is focused on the need to get off the beaten path, that appreciates local voices, that gives voice to the everyday traveler, the budget traveler, the urban traveler. i believe that the reason people dont travel is because of the poor quality of tourism info.
