I've been using BPSNMPUtil for years now, and I'm never having problems with it. The only real issue that I've had with the software is the fact that is no longer updated. That said, it works well, and it runs smoothly. This software does exactly what it was designed to do. It's a great tool to do your network SNMP (Simple Network Management Protocol) management. I do wish that it was more up-to-date,
